

Powerful Instruments for Very Small Forces. Nanotechnology for Life Sciences by JPK Instruments.

JPK Instruments is a leading manufacturer of nano-analytical instruments – particularly based on atomic force microscope (AFM) and optical tweezers systems – for life sciences and soft matter application.

Take a closer look at our solutions. Visit us at our booth to see the NanoWizard II BioAFM with the most sophisticated true optical integration with DirectOverlay™ and highest resolution without compromises. Our team is looking forward to discuss your applications!
